Methodology and weighting convention

The Syntax® Moat Index weights by Syntax Pure Value Score up to 50 of the top large-cap publicly traded US companies as ranked by their Syntax Market Share Scores. The Index applies screens for profitability, liquidity, and size. The Syntax Market Share Scores use company classification data structured in Syntax's proprietary Functional Information System (FIS)®, which draws primarily from audited annual reports (e.g., 10-K filings) and secondarily from unaudited documents (e.g., news articles, company websites) to allow granular groupings and comparisons of companies by the characteristics of their various product lines.
